

The Technology Center CTM in Barcelona are looking to put forward a project in Africa under the topic

“ENV.2010.3.1.1.3 Decentralised water supply and sanitation technologies and systems for small communities and peri-urban areas”

We are looking for potential partners for this call in one of 2 areas:

- 1) Risk (economical, technical etc) of the implementation of various water and sanitation technologies in Africa
- 2) Innovative technologies for decentralised wetlands for treatment of waste water in Africa.

David Smith
