

Dear Colleagues,

Our company is well trained and highly experienced in conducting / developing research-development projects under National and European Research Programs.

Main domains of competence:

Railway- and urban rolling stock

Railway transport

Transport management

Our company is interested in getting involved into a partnership with you under the theme area specified (within our area of competence) with a view to a joint participation in developing certain projects under FP-7, area 7.2.

According to the project specific character, the project manager's vision, and the discussions with the project manager, our company has the capacity and can participate on its own or make up and coordinate a partnership in Romania in order to better cover various domains and activities.

The theme you have proposed is really challenging and particularly of great interest for us all, the inhabitants of the planet Earth. We could work together under this project whose message conveyed and up-to-date status make it really special.

We assure you we will find the best form of organization in order to carry out the research & development-related activities that will be our responsibility, in due time and up to the requirements.

Please submit our point of view and any possible completions / clarifications you may consider necessary.

Best regards.

Aurelia Catrina

Development Manager
